## Canterbury Junior Chess Club Open day Sunday February 20 from 1:30 to 5:30

**Here are some reasons why you should visit us on our open day and join the club activities for you and your children**

It is pretty well confirmed that the learning of chess helps students to improve their concentration. It teaches them patience it helps them improve their problem solving skills.

As Katrin Wills past Chess Victoria president puts it: **Why Chess? Chess is a fantastic game that can not only entertain you for hours but also can help you become independent thinker, it can further develop some of your skills such as self-starters, the ability to analyse and reason, be quick problem solver, strategist and good planner.**

The following skills will become part of your every day thinking: **Problem Solving, Abstract Analysis, Spatial Aptitude, Verbal Reasoning, Combinative, Logical and Critical Thinking, Intellectual Maturity, Originality, Cognitive Skill Enhancement, Concentration, Increased Memory Capacity, Organisational Skills, Decision making under pressure and much more.**

**I believe that the game of chess is the only game that can teach you while you are playing how to improve and better live your life!**

One thing Katrin does not mention is that at the other end of the scale playing chess keeps your brain working and keeps dementia at bay. Hardly an issue at a Junior Chess club but an important issue at senior levels

Both Katrin and I look at chess as a competitive recreation [or sport] and I am not sure how this works with chess as a parlour game. What we can hope for here is that families who enjoy playing will move to improve skills by joining our chess club and improve their and their children's skills by being coached and participating in our tournaments
